CTE 360

PACKED WITH FEATURES

LESSON PLANS

Teachers can create detailed lesson plans, including linkages to tasks, academic standards, NOCTI test objectives, industry certifications, and more. This allows teachers and administrators to ensure students are adequately trained and prepared for success.

TASK LISTS

Create multiple task lists and align tasks to state requirements, NOCTI, and industry standards. Easily see if tasks have been addressed in a lesson plan and create performance objectives. Task lists can also be shared between multiple classes.

CAREER READINESS

View the status of all of your students' work-based learning experiences from one easy-to-use dashboard! Track employer clearances and other required documents, such as workers' compensation insurance. Students can also do career explorations and upload pay stubs or other documents.

PAPERLESS FORMS

Imagine no more folders filled with paper forms! Digitize all of your school forms, complete with online signatures, drag & drop field placement, calculations, PDF generation and more! Create as-needed, required, distributable, or public forms to handle every use case imaginable.

STUDENT PROGRESS

Teachers love the ability to easily track the mastery of tasks using a gradebook-like interface. You can also upload industry certification credentials and certificates and track hours for state requirements.

ADVISORY BOARDS

Our powerful advisory board module allows you to define members, create agendas, track meeting minutes, and send an administrative response. You can also fill out forms, attach documents, and track meeting attendance.

ASSET MANAGEMENT

Track the equipment, tools, and supplies used throughout your facilities. This can be used to inventory items and can serve as a place to store manuals, warranties, or other documentation. One or more maintenance schedules can also be assigned to a piece of equipment.

AUDIT DOCUMENTATION

No more binders and piles of paper! Store all of the documentation required for state audits and accreditation reviews digitally. When it's time for an audit, the review team can access all required documentation through a user-friendly interface. You can also store all of your policies in one place.

AND MUCH MORE...

Packed full of features that you just won't find anywhere else, we are constantly adding new features based on the feedback we receive. For the more updated list, check our website or schedule a demo.
