You may comment on any parts of the DEIS and PLRMP. The following topics will help you focus your comments and help us to better respond to your comments. You do not have to fill in every section in order to comment. At the end of the form, you will find a place to comment on other issues, alternatives, management direction and monitoring. Feel free to use additional pages.

**Issues in the DEIS (please check the topics you are commenting on)**

- ☒ Forest Vegetation ☐ Habitat Diversity ☐ Recreation  
☐ Special Areas including Roadless Areas and Wilderness  
☐ Other Concerns

The 1995 Timber Resource Capability Study projected that the current sustainable harvest would be approximately 53 MMBF per year. The Study also indicated that the sustainable harvest could be as high as 72 MMBF per year if upland hardwoods could be adequately regenerated. Through adaptive management strategies and improved upland hardwood science, it is now possible to adequately regenerate upland hardwoods. Therefore, the Proposed Plan must be rescinded and revised so that the preferred alternative proposes an ASQ of at least 72 MMBF per year, and not 56 MMBF per year.
