

myLunchMoney.com Info

- ✓ The WebSMARTT component along with myLunchMoney.com will give parents access from home into what their child bought for lunch and what their child's account balance is. The parents will also have the option to add money into their child's account via credit card for a nominal fee of \$1.95 per transaction.
- ✓ If a parent makes a transaction on Monday and again on Tuesday they will be charged two fees. If a parent has two students and makes a deposit for student A and student B at the same time it is considered one transaction and one fee.
- ✓ If a parent as a student at two different buildings each building is considered a separate transaction resulting in a fee for each.
- ✓ The only fee the district would ever be charged is a "Chargeback Fee". This fee is a fee of \$15.00 that will be charged to the district for each chargeback transaction. A chargeback is any disputed credit or off-line debit card sale that is returned for reimbursement to the cardholder's account. SL-Tech will invoice Client for chargeback fees associated with such transactions.
- ✓ Please note – the credit card deposit to this is totally voluntary. We cannot turn this feature off, I asked. You can still login and use this site to monitor a student's balance and ordering history. You never have to make a credit card payment in order to use this system. Students and/or parents can still bring in and have money deposited into their accounts as they have always done so and these account balances will be available from myLunchMoney.com.
