

## Executive Summary

Topic: Websense Web Security Renewal

Committee Date: May 31, 2011

## Summary

Websense Web Security is the software package used by the district to filter web access, provide internet utilization reports and remain compliant with eRate requirements. The FCC has set regulations that all schools and libraries accepting eRate reimbursement must filter all the web traffic from the organization.

The quote provided is through the IU5 which has secured consortium pricing for a 3 year contract. The new pricing realizes a savings from our current contract of \$350 per year. The licensing suggested covers all computers in the district.

Funding is currently available through the regular Technology Maintenance Contract account, while future installments will be included in the Technology budget.

## Recommended Motion

That the Board of School Directors approves the 3 year contract from the IU5 consortium to purchase 2500 seats of Websense Web Security for \$11,250.
