	Football Field	Good
	Cross Country Course	Good
	Gymnasium	Good
	YEMS Gymnasium	Good

- |   |                                                                                                                                                                                                                                 |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | The Football fields at EHS have been under renovation. When observed on 6-10-08, the game field turf looked good. However, the boundaries of the work areas still are uneven and the practice fields need additional attention. |
| 2 | The Sheffield Sports Boosters and Sheffield Township have initiated the renovation project at SHS. New bleachers have been installed. The field surface appears good.                                                           |
| 3 | The gym floor at SAHS was damaged at the end of the school year. Repairs are now underway. It will be a very close schedule to complete the repairs by August 11.                                                               |
| 4 | The turf at WMF has been replaced. The new surface is excellent.                                                                                                                                                                |
| 5 | The WAHS Tennis Boosters has initiated a court renovation project. That project is just now getting underway.                                                                                                                   |
