Hello again Ruth,

Please delete the first email with the website link error. Please replace it with this message:

Dear School Members,

Thank you for the opportunity to respond to the reconfiguration study.

Having read in various documents and news stories that "No options or proposals are on the table.", I would urge you to give fullest attention to the proposal and vision which appears on the website www.2schools1fight.org. This plan, which proposes establishing 5 local boards representing each of the county's attendance areas, is visionary and innovative. The plan would give local boards decision making freedom on an array of matters that are attendance area concerns while maintaining a 'reduced in size and scope' Warren County District Board. One of the benefits realized by such an arrangement would be the healing of the distrust that has been a quiet cancer destroying WCSD unity since its formation.

The proposal found on the website presents beliefs that undergird such a proposal as well as benefits that would be realized by all attendance areas in the county.

The time has arrived for a bold and courageous school board to lead education forward in a 'reconfigured' manner where--in a true sense--we all have a chance to 'start over.'

Would that not be refreshing? Would that not be challenging and inspiring? Wouldn't it be beneficial and satisfying to all of us--board members, administration, staff, students, parents, communities--if rather than employing a worn-out idea of consolidation, we together achieved a unified, cutting-edge education for our students?

Again, I draw your attention to the "Our Vision" proposal found on the named website. Thanks you for your efforts.

Mark Lindberg
