

Projected Enrollment 2008/2009 Computer Systems

Scheduling is now taking place in all district high schools. The present 9th and 10th graders are being surveyed to discover the level of interest in providing the Computer Systems Curriculum as both groups scheduled for 2008/2009 classes. The numbers below represent a small number of responses because of the delays in scheduling due to weather and PSSA Testing. Eisenhower and Warren Area High numbers are estimates based upon the numbers provided by Sheffield and Youngsville.

Schools:	9 th Grade		10 Grade	
	Yes	No	Yes	No
Eisenhower High ** listing incomplete	3		5	
Sheffield High	7	31	2	53
Youngsville High	1	53	7	57
Warren High **listing incomplete	10		21	
Totals	21	84	35	110

It appears that 21 present 9th graders and 35 present 10th graders are interested in the Computer Tech/Systems class. This is a combined total of 56 students interested in the class. We anticipate a class of 8 in the am and 10 in the pm.

The question becomes--- what enrollment number needs to exist for the class to move forward to the planning stage?
