

# **Eisenhower High School Athletic Improvement Proposal Outdoor Facilities**

## **Fencing**

Fencing in our football /track area in our opinion is the utmost of importance. The facility cannot be secured and over the years the field, press box and back side of the school have been vandalized. We feel this is a direct result of not have this area secured by fence.

**Estimated Cost for this project is \$25,000**

## **Track upgrade**

With over 15 years of neglect it has become almost impossible to run a track meet at our facility. We wish to have our track resurfaced with crushed limestone and our lanes cut back to the 6 lane regulation. Most schools dislike running on our track because most district qualifying times cannot be met on our track due to its condition.

**Estimated cost for project is \$17,590**

## **Football Scoreboard**

Our current board is outdated and parts to fix ongoing problems are almost impossible to find. This is something we feel needs immediate attention.

**Estimated cost for this item is \$9,995**

## **Pole Vault Landing Pit**

For several years our track team has been unable to pole vault because on safety regulation regarding this track event. We have been without a landing pit since this regulation came in to affect. We give away 9 point each meet because we do not compete or offer this event at our facility. We wish to begin vaulting again. If we are going to offer the offer this sport then we should offer all its events.

**Estimated cost for this item is \$10,900**

## **Electric Service to our Soccer and Softball Fields**

Currently there is no electrical service at either location and we run scoreboards and concession stands off of battery and generator power. We feel electric at both sites in important. WCSD Maintenance has informed us that running a line from the garage on Fairbanks Road is not feasible. They suggest a new line drop be made.

**Cost of this project is cost of the electric bill each month.**

**Painting of Press Boxes**

Both of our current press boxes are in need of being repainted. This is a project that may be done by WCSD maintenance staff for the price of the paint.

**Estimated cost of this project is \$500 (Excluding labor)**

**Portable Bleachers**

Eisenhower currently has portable bleachers for approximately 300 people on our football field and for 100 people on Soccer /Softball Field. We would like to add portable bleachers on wheels to move from site to site for another 200 people. These would be four units to hold 50 people each.

**Estimated cost for these items is \$11,200**

**High Jump Landing Pit**

Our current pit is over 20 years old and is in horrible condition. It was reconditioned 8 years ago and has deteriorated badly. The current pit is infested with mice droppings and bees nests. This is a piece of equipment that needs replaced ASAP.

**Estimated cost for this item is \$6,300**

**Soccer/Softball Scoreboard**

We would like to erect a scoreboard on our soccer/softball field site. This however cannot be done without electrical service at the soccer field site.

**Estimated cost for this item is \$4,745**

**Fencing –Soccer Field**

This is a request again because of vandalism. The soccer field has been hit each year since its construction. This has mainly rutting the field with Trucks and Four Wheelers. Also, soccer equipment has been damaged.

**Estimated cost for this project is \$21,000**

**Storage Shed**

We are in desperate need of additional outdoor storage facilities. We request a 16x24 unit be constructed and placed outside the track on the north end of the football field. The building could probably be constructed at the Career Center for the cost of materials.

**Estimated cost for this project is \$2,500-\$3,000**

**Softball Dugouts**

This is a request for safety issues along with keeping the player out of inclement weather. It also keeps the players and fans apart and away from distractions.

**Estimated cost for this project is 6,400**

**Softball Backstop**

The current backstop is in poor condition and we are looking to replace it. We are looking at a chain linked winged unit. This would be a 10 X 20 X 10 sections with an extension of 5 feet over the center section.

**Estimated cost of this item is \$2,216**

**Fencing for Softball Field**

We are looking to enclose the softball field as we have the football/track and soccer areas. This is for safety reasons along with protecting our facilities from vandalism.

**Estimated cost of this project is \$8,000**

**Drainage on Soccer Practice Field/  
Cross Country Course/Softball Field**

There is constantly water lying on this part of the upper athletic complex.

It inhibits are ability to practice and play contest on that site. Some type of drainage system or water relief would be appreciated.

This project needs to be looked at by grounds for a possible summer project.

**Total Estimated cost for all projects is \$126,846.**
