February 12, 2009

Dear Marty Siddall,

On behalf of the Warren County Career Center's welding teacher and welding students, I want to thank you for your continued advisory committee support and your company's generous donation of the gently used Power Wave 455/PF10 welding machine. The multi-processor welding machine will provide new experiences for our students.

This partnership with a welding manufacturing company is a positive experience for our rural school. Your gift helps to bridge the gap between school tools and work expectations. These machines are currently in use at one of Warren County's major employers.

Please let interested parties in your company know of our appreciation.

Delores E. Berry
