

## **Executive Summary:      WCCC Planned Instructions/Programs of Study**

### **Summary:**

Attached is the proposed planned instruction for Auto Collision Technology, Automotive Technology, Pre-Engineering Technology, Electronics Technology, and Machine Technology. Staff members from the WCCC have been working on completing these since the beginning of the school year to bring our course plans into compliance with the requirements of the PDE. This is a three year process of curriculum updates for Career and Technical Centers which requires the identification of specific competencies in planned instruction.

### **Financial Implications:**

There will be no financial implications since we didn't really need to change what we were doing, just the format in which it is presented.

### **Recommendation:**

That the Board of School Directors approves the planned instructions for Auto Collision Technology, Automotive Technology, Pre-Engineering Technology, Electronics Technology, and Machine Technology.
