Designed for Comfort. Engineered for the Environment.

Thoughtful design and intelligent engineering were performed with core principles focused on sustainability and structural integrity. Metal brackets are engineered using high-tensile-strength steel and meet or exceed all industry test standards. The well-engineered copolymer seat, back and arm coverings are durable, attractive and easy to clean. The self-rising, gravity lift seat design is a maintenance free solution. **Core** holds up to the challenges of a busy classroom as well as the physical demands of indoor sporting events.

Seat Identification Tags

100% post-consumer recycled plastic back inner

Plastic Arm Caps

Rear Mount Cup Holder

Versatile Features and Options to Complement any Venue

Back angles can be fixed at various degrees for both 34" and 36" back heights

A.D.A. compliant

Three quarter fold seat offers easy access and hands free user movement

The tablet arm surface folds smoothly out of the way when not in use

Gravity lift seat enables the seat to return to the up position when not in use

Robotic fully seam welded steel standard ensures consistent structural properties

Three module component sets create six chair widths from 19" to 24"

The curved back inner provides base comfort and ergonomic support

No adhesives (VOCs) used in the upholstery process

Engineered copolymer seat, back and arm rests are durable and easy to clean

Seat ID recessed directly into the seat pan

Structural inner seat back made with patented ReTek® recycling process

60% of **Core's** weight is made of post-consumer recycled materials

Material Samples Available

Orientated strand board (OSB) seat structure under a 3" molded foam cushion provides enduring comfort, strength and sustainability

Plastic Backs

Plywood Veneer Backs

Wood Arm Cap and Wood End Panel

Laminate End Panel. Row Identification and Aisle Light, available with low voltage and LED bulbs

Our Mission

Since 1886, American Seating has set the standard for product design, durability and comfort. Today, we remain committed to exceeding the expectations of our customers. Our achievements serve as the platform for new and innovative products that continue to be the benchmark of our industry.

Dimension®

The Space-Saving, Versatile Solution
for Lecture Halls, Stadiums,
Arenas and Courtrooms

The Versatile System That Maximizes Seating Capacity and Comfort.

Dimension 674

Double-wall plastic seat and back

Dimension 675

Doubled-wall plastic seat and back shells with padded fabric inserts

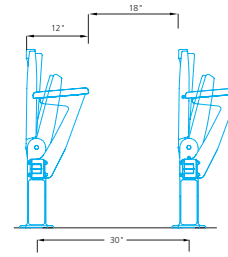

Dimension 677

Fully upholstered seat and back

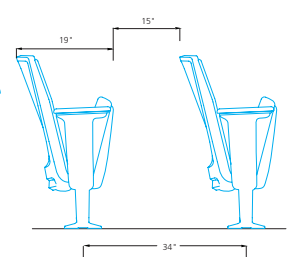

Dimension® is an ergonomic chair which allows for more clearance space behind unoccupied seats, making it ideal for environments that desire greater seating capacity within limited space.

The **674** and **675** models offer a three-quarter fold seat and an articulating back which moves to an upright when not in use. The slim envelope design allows for more space than traditional fixed back seating solutions. Model **677** varies slightly from the **674** and **675** models with a natural recline that can be adjusted manually to an upright position.

Dimension Spacing

Traditional Spacing

- a. Double-wall molded plastic seat and back with padded fabric inserts
- Seat and back also available in all plastic or fully upholstered options

- b. Row letter plate

- c. Donor plate

- d. Three-quarter fold seat hinge, and automatic or manual forward articulating back

- e. Seat number plate

- f. Wood and plastic armrests or armless models are available

Chair modules are interchangeable throughout the **Dimension** system, regardless of mounting style. Modules requiring replacement can be easily removed. One size module allows for reduced inventories.

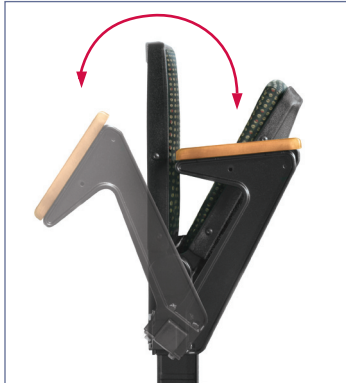

Fixed beam mounting for general seating or suite chairs

Dimension's articulating back and $\frac{3}{4}$ fold up seat offers increased accessibility behind unoccupied seats

Dimension® Offers Options for Added Flexibility.

A.D.A. Compliance

Dimension is designed to meet all of the accessibility compliance standards of the Americans With Disabilities Act (A.D.A.).

Armrests

Dimension armrests are available in a plastic or wood.

Seat/Row Identification

Seat and row identification, and donor plates are available.

Folding Tablet Arms

Standard ($12\frac{3}{16}$ " x $13\frac{1}{8}$ ") and oversized ($15\frac{3}{8}$ " x $13\frac{3}{16}$ ") tablet arms available (standard shown). Tablet arms meet Life Safety Code (NFPA 101) and International Building Code.

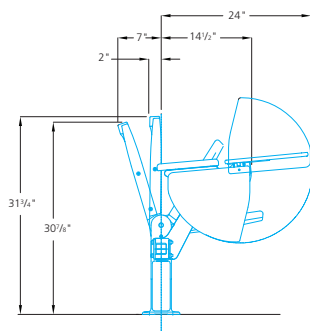

Power and Data Raceways

U.L. listed raceway offers convenient access to power and data. The raceway includes one data port location and one simplex electrical outlet per chair, providing power for up to twenty-six chairs per power feed.

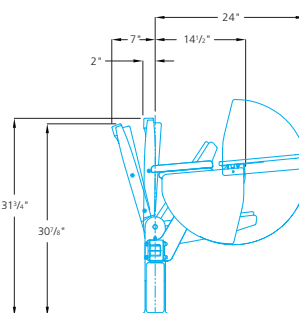

Aisle Lights

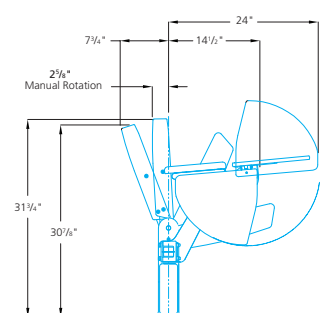

Light on end of beam directs soft glow downward.
