Transform learning with an adaptive intervention solution

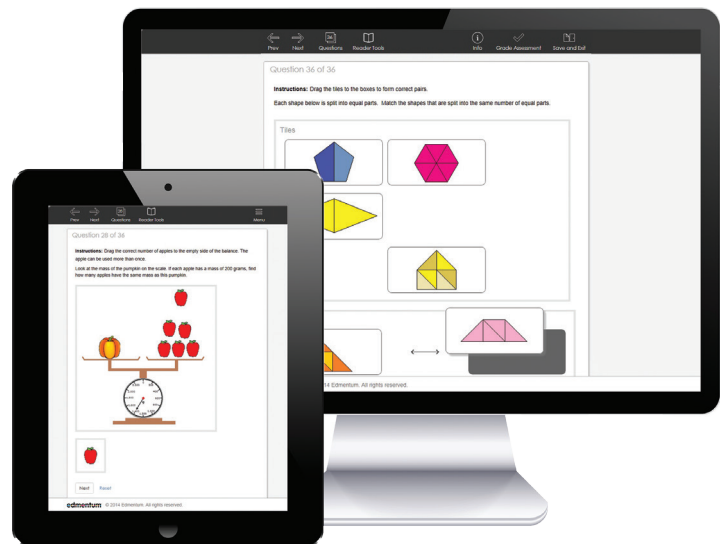

Edmentum's adaptive intervention solution provides meaningful tools to help you identify students not keeping pace, pinpoint weakness, and target individual student needs to ensure success. Our programs are uniquely designed to provide focused instruction and support to raise student achievement.

Our diagnostic and placement assessments help educators understand each student's unique needs to more effectively guide instruction. Our assessments not only provide educators with the tools they need to understand baseline competencies and monitor student progress, but also integrate with our high-quality, rigorous curriculum, providing a personalized learning path for more targeted instruction. Plus, immediate feedback and real-time progress monitoring help identify and close knowledge gaps at the individual and class level.

Technology-enhanced item types

Edmentum's adaptive intervention solution has over 10,000 questions featuring a wide variety of item types that are designed to promote higher-order thinking and inquiry. Our item types ensure that each question is written to the appropriate difficulty and DOK level and students are exposed to the appropriate content.

- Multiple Choice
- Matched Pairs
- Constructed Response
- Hot Text
- Multiple Response

Tools to complete your intervention program

Edmentum™ ACCUCESS

Adaptive, diagnostic assessment solution that quickly and efficiently places your students at grade level in reading, writing, and math.

- Accurately assess students grades 5 through adult.
- Automatically prescribe rigorous content to personalize learning.
- Evaluate student knowledge and skills before beginning instruction.
- Identify target areas needing special emphasis for an individual or small group.

Edmentum™ TEST PACKS Rx

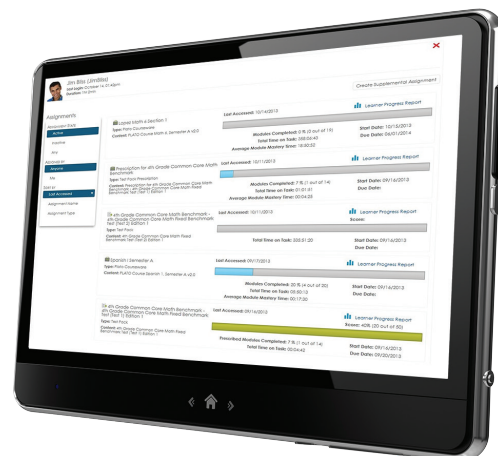

Individualize areas of need and target instruction through rigorous assessments with Edmentum™ Test Packs.

- Assess your students grades 3 through adult against state, national, and Common Core standards and end-of-course exams with fixed benchmark tests.
- Easily administer multiple comparable milestones to automate fluid individualized prescriptions for every student.
- Promote higher-order thinking and inquiry with technology-enhanced item types that provide broader coverage of depth of knowledge (DOK) levels.
- Customize your assessments at the reporting category level to direct smaller areas of focus.

- Assign supplemental material to offer targeted intervention
- Monitor student usage and progress of prescription content quickly from the dashboard
- Create groups to monitor progress of students based on skill, need or structure of program
- View progress and take action on district and program level data
