

## Executive Summary

Topic: Cisco Umbrella Web Filtering

Meeting Date:

### Summary

The IU5 has created a consortium in partnership with Cisco to make Cisco Umbrella Services available to school districts serviced by the IU by banding districts together to provide affordable web filtration. School Districts such as Conneaut and Penncrest are taking part in the consortium.

Cisco Umbrella Services will provide us with a filtration solution that will work both within our network and without. Umbrella will also resolve connection related issues for our mobile users in addition to providing wider protection for students.

Cisco Umbrella licensing works on a per user basis, but with our participation through the IU5's consortium this will only encompass Full time employees (FTE) with students being free of charge.

The Quote per the IU's Warren Cisco Umbrella Service Agreement is as follows:

FTE=700    Price for Three Years:  $(700 * \$83.97)$  \$58,779.00    Price per Year: \$19,593.00  
Price per FTE per Year: \$27.99

This is a three-year agreement with the payment being annually.

### Recommended Motion

The Board of School Directors approves the quote from the IU-5 to purchase Cisco Umbrella services three-year agreement for 700 FTE for \$58,779.00 per the Warren Cisco Umbrella Service Agreement.
