Warren County School District- WAEC Panel Migrations
6820 Market Street
Russell, PA 16345-3406
Attn: David Undercoffer

Dave,

Siemens Building Technologies has supplied the Warren County School District with Desigo automation controls for your HVAC System. Control devices are combined to make a system. All the control panels communicate with each other on a proprietary communication network, developed specifically for Siemens Desigo automation controls. The software used for programming the system is proprietary, as are the components entire control system. Siemens Building Technologies branch offices are the only authorized distributors of the products. Our employees go through extensive training to be able to program the system.

All Siemens Building Technologies branch offices offer Technical Support Programs that will ensure your continuous, trouble-free system performance after installation. I would be happy to meet with you to discuss any specific quotes or questions you may have.

If you should need any other information, please contact me.

Sincerely,

Jeff Duncan
Client Service Manager
