JUN 28 2006

June 28, 2006

To: The Board of School Directors of Warren County School District, Warren, PA
Ms. Nuttall, Board President, Mr. Freestone, Board Vice President,
and Board Members Mr. Dunham, Mr. Knapp, Mr. Lindberg, Dr. Martin, Mr. Schwanke,
and Mrs. Wortman

Dear Members of the Board:

I respectfully submit the attached application to fill the vacant position on the Warren County School District's Board of School Directors representing Region III and request your consideration.

We had a choice of where we would like to retire and made Warren County our home. I desire to serve, in the public sector, the citizens of Warren County. Being in the private sector all of my life, I possess a suite of skills and knowledge I believe will support the District in the light of continued economic globalization and technology.

I stand ready to answer questions regarding my candidacy for this position at the Board's pleasure.

Sincerely,

J. F. (Jeff) Lockett

APPLICATION FOR
SCHOOL BOARD VACANCY

Warren County Career Center Advisory Council

Eisenhower Middle/High School Parents/Citizens Advisory Team

Warren County Technology Task Force

Warren School District's Strategic Planning Committee (Technology Section)

Additional Information:

Have attended, over the past 1½ years, almost all of the District's public meetings, both committee and board, providing a knowledge of the District's activities.

In the election of May, 2005, received over 49% of the votes cast for the region III board position indicating a strong voter approval.

Please see attached abridged biography

Biography of J. F. (Jeff) LOCKETT (abridged)

J. F. (Jeff) Lockett was the Chief Scientist of Sola Communications, who provided a variety of communications services and products, as well as, process, and monitoring systems. Previously, before its acquisition by Sola, he was President, Chief Executive Officer, and Chief Technical Officer of JFL Communications, Inc., an international provider of Satellite communications and manufacturer of electronic products for use in satellite communications for the oil and telecommunications industries.

Mr. Lockett's expertise includes corporate management, electronics research and development management, telecommunications and satellite system design, strategic market/technology planning, merger and acquisition evaluation and implementation, and digital, analog, and microprocessor systems design. Of note, Mr. Lockett lead the team to design and manufacture of one of the few commercial grade inertially stabilized, motion compensation antenna systems in the world today.

Prior to forming JFL Communications, Inc., Mr. Lockett was operations and engineering manager of a joint venture between Satellite Business Systems (owned by IBM, Comsat, and Aetna Insurance) and GeoSource, Inc (the world's largest seismic exploration company at that time). He designed, built, and provided the technical guidance for a major communications teleport in Houston. He also designed transportable C and Ku-band satellite earth station systems that operates worldwide, most specifically in the contiguous 48 states, the North Slope of Alaska, and in Africa, both on-shore and offshore. Previous to this, Mr. Lockett was head of a Fortune 200 company's Research & Development's Center for Electronic Technology.

Mr. Lockett has over 40 years experience in fields including the voice, broadband data, satellite communications, electronics, and in the broadcast & recording industry. He has eleven patents in the fiber optic and process control fields, as well as, satellite data transmission. His other accomplishments are in the food processing industry. He has been involved in electronics since age 7.
